

The **Development Partner** That's On Your Team

We protect your reputation, and deliver with the ownership you expect
from a partner

About Us

Your Production-Grade **SaaS** Partner

JoulesLabs is a high-trust development partner for SaaS founders and agency teams who are done managing freelancers, rewriting broken builds, or chasing updates.

We operate like part of your team. Thinking ahead, raising flags early, and delivering code that's clean, scalable, and release-ready.

- ◆ For **founders**, we act like co-builders, not task-takers.
- ◆ For **agencies**, we protect your reputation like it's our own.

We've seen it all: ghosted timelines, MVPs held together with duct tape, "affordable" devs who cost more long-term.

*"We're the team you bring in when the **next sprint** actually matters."*

Story

30+ Product Developers

Not just coders, a team that thinks in outcomes. From architecture to UX, we build with the mindset of your most reliable teammate.

We blend startup speed with engineering depth, earning long-term partnerships through work that speaks louder than decks.

35+ Projects Shipped

From SaaS dashboards to internal tools, from AI agent builds to DevOps infrastructure — we've delivered launches that scale, stay up, and stay clean.

**Built on *Ownership*.
Grown Through Trust.**

“We take pride in our world-class team, fueled by passion and expertise in SaaS Development”

What We **Solve**

For SaaS Founders:

- ◆ MVP shipped — but code's fragile, and rewrites are piling up
- ◆ Internal team is stretched, progress is slow
- ◆ Last devs followed instructions, never thought ahead
- ◆ MVP shipped — but code's fragile, and rewrites are piling up
- ◆ You're stuck managing chaos instead of building product

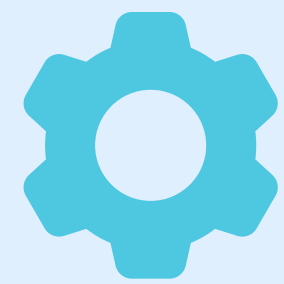

*“You don't need more **tickets closed**. You need outcomes owned.”*

For Agencies:

- ◆ Your core team is at capacity, but deadlines won't wait
- ◆ Timelines shrink, expectations don't
- ◆ You need clean white-label delivery — without micromanaging
- ◆ Past partners overpromised, underdelivered — and you took the hit

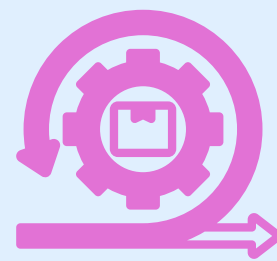

*“You don't just need developers. You need a **development team** that protects your name.”*

How We Work

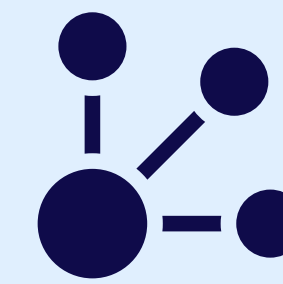

Kickoff & Setup

- ◆ Sync with roadmap or brief
- ◆ Assign Product Owner + Dev Pod
- ◆ Establish outcomes, risks, and access in 48 hours

2-Week Sprints

- ◆ Feature planning + architecture
- ◆ Weekly Loom walkthroughs
- ◆ Git-based QA + async 1:1 follow-ups
- ◆ Review-ready before client handoff

Optional Retainers

- ◆ Stay for support, scale-ups, or the next phase
- ◆ Plug into Slack, Linear, Notion or stay async via Loom + Email

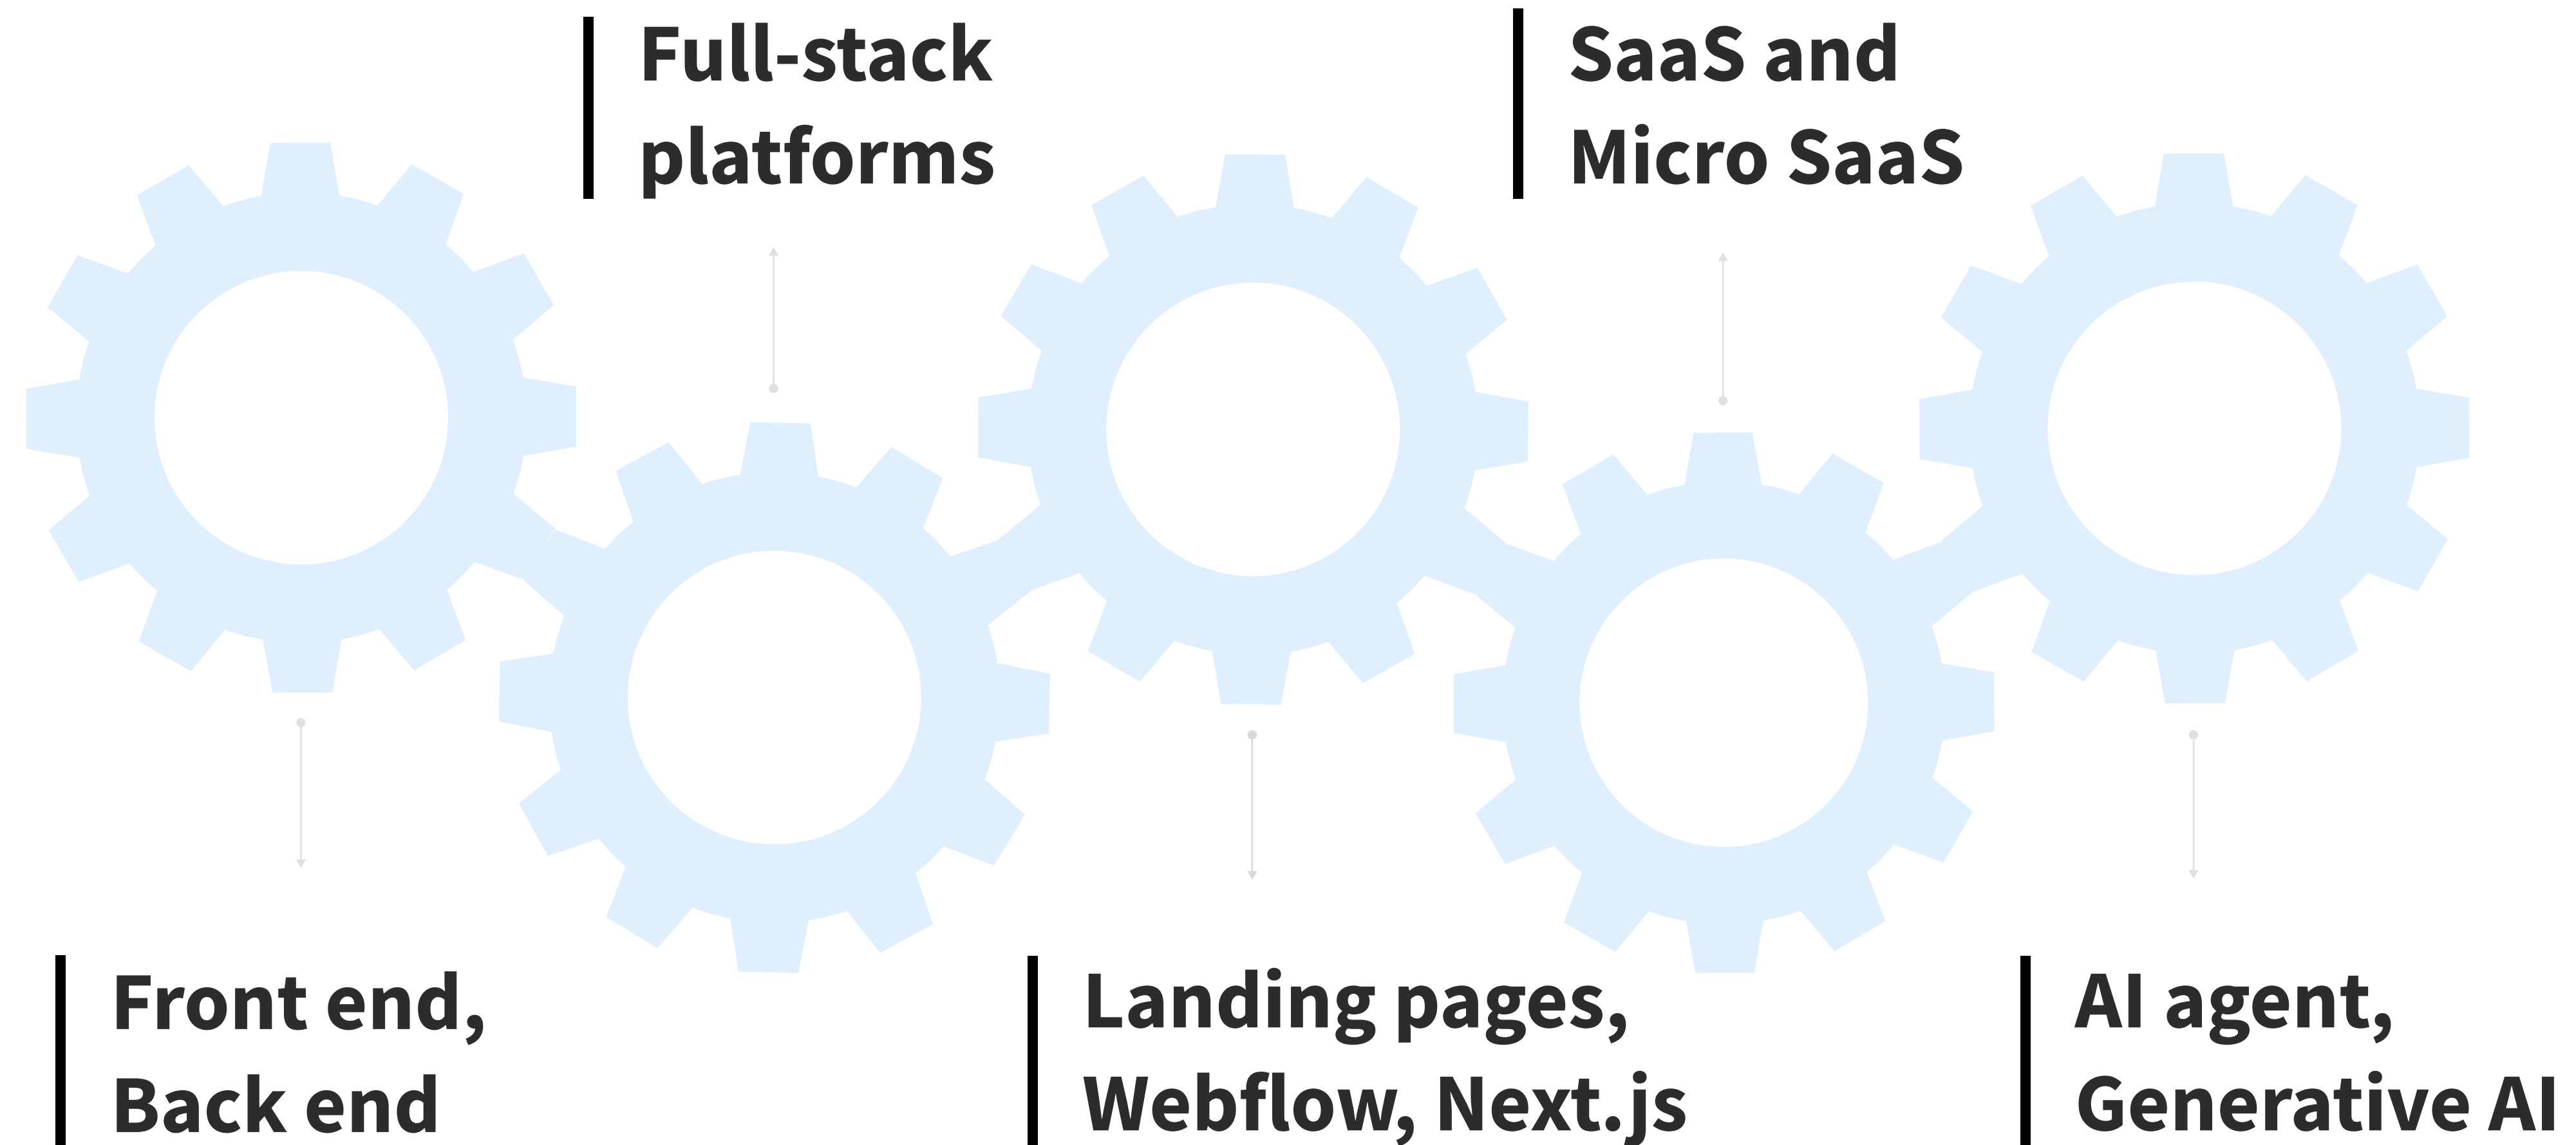

Our Edge

- ◆ We recommend what's right, even if you didn't ask
- ◆ We raise risks **before they cost you**
- ◆ We notice what's missing, **not just what's broken**
- ◆ You always know what's done, what's next, and what's blocked

Your **Delivery** Team

- ◆ A senior Product Owner stays in sync with your roadmap
- ◆ A **focused development team** built around your product, frontend, backend, DevOps
- ◆ Ability to scale up with additional devs as project demands grow
- ◆ Optional UI/UX and design support available based on product stage

White-Label **Development Services** (For Agencies)

Tech Philosophy ↙

We don't just build fast — we build right.

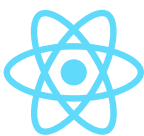

- ◆ Use the simplest stack that can scale
- ◆ Build clean: modular, documented, and rewrite-free
- ◆ Think long-term: no duct-tape fixes

Tools & Stack:

Backend Development:

								
PHP	Laravel	Node.js	Python	Django	Go	.Net	C#	FastAPI

Frontend Development:

						
React	Vue	Next.js	TypeScript	TailwindCSS	Material UI	Shopify Polaris

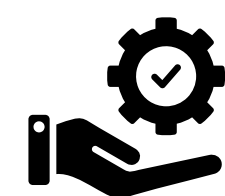

DevOps & Infrastructure:

					
GitHub Actions	Docker	Kubernetes	Grafana	AWS	GCP

PM & Collab Tools:

						
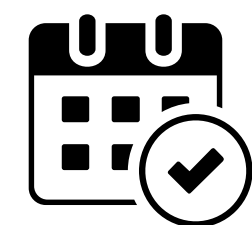

Bordio	Taiga	ClickUp	Jira	Notion	Google Docs	Google Sheets
						
Confluence	Slack	Mattermost	Discord	Rocket Chat	WhatsApp	

How We Can **Work Together**

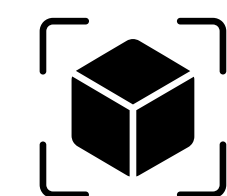

Fixed Project

You give us the scope, we give you a fixed quote and timeline.

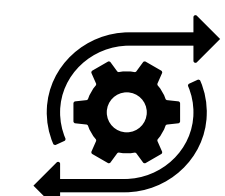

Monthly Retainer (Managed Team)

A full product pod working on your roadmap, managed and delivered by us.

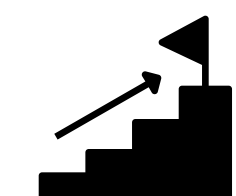

Staff Augmentation

We supply devs who plug directly into your team. No middle layer, just execution.

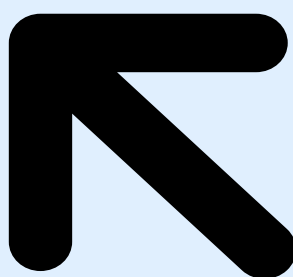

Hybrid (Advisory + Execution)

For founders or teams who need both strategy and dev. We help shape the roadmap, then ship it.

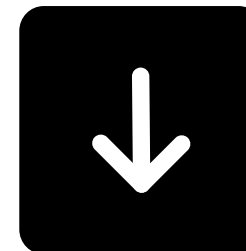

Scale-Up Support

Already building but need more speed? We add extra hands quickly without dropping build quality.

Web & Mobile App for Proprietary Trading Firm

FundedNext

FundedNext is a proprietary trading firm that provides traders with capital and access to global markets, enabling them to maximize their trading potential.

Headquarters

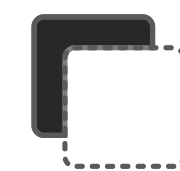

Dubai, UAE

Industry

Fintech, Proprietary Trading, Financial Services

Service We Provided

- ◆ UX/UI Design
- ◆ API Development
- ◆ Backend Development
- ◆ DevOps Managed Services
- ◆ Mobile App Development

Background

FundedNext is a proprietary trading firm that empowers traders by providing capital and funding opportunities. They offer traders access to global financial markets, helping them maximize their potential with advanced tools and resources.

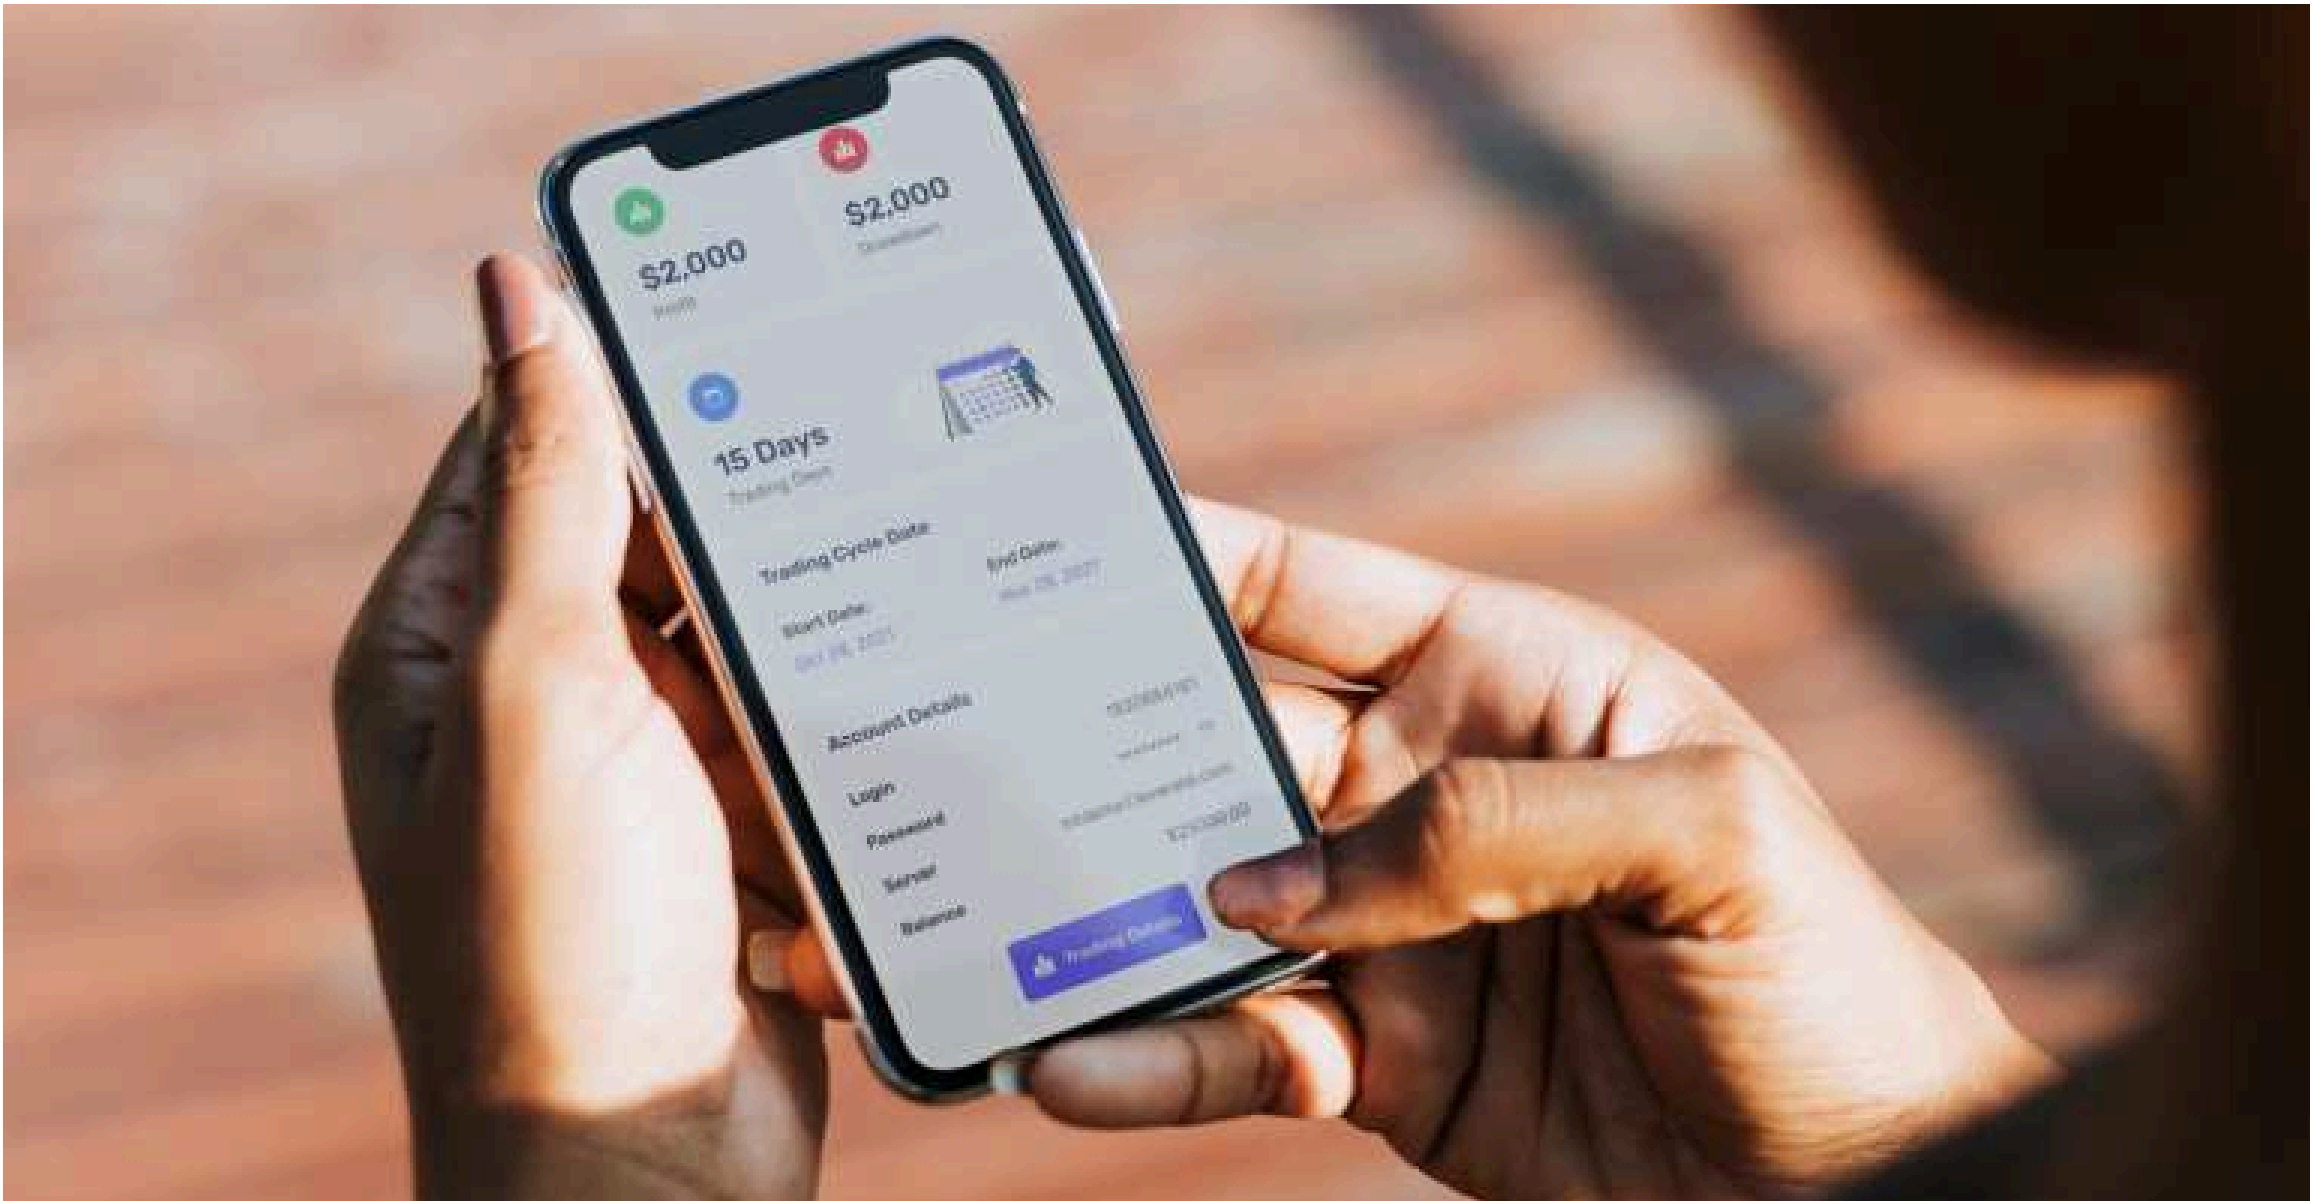

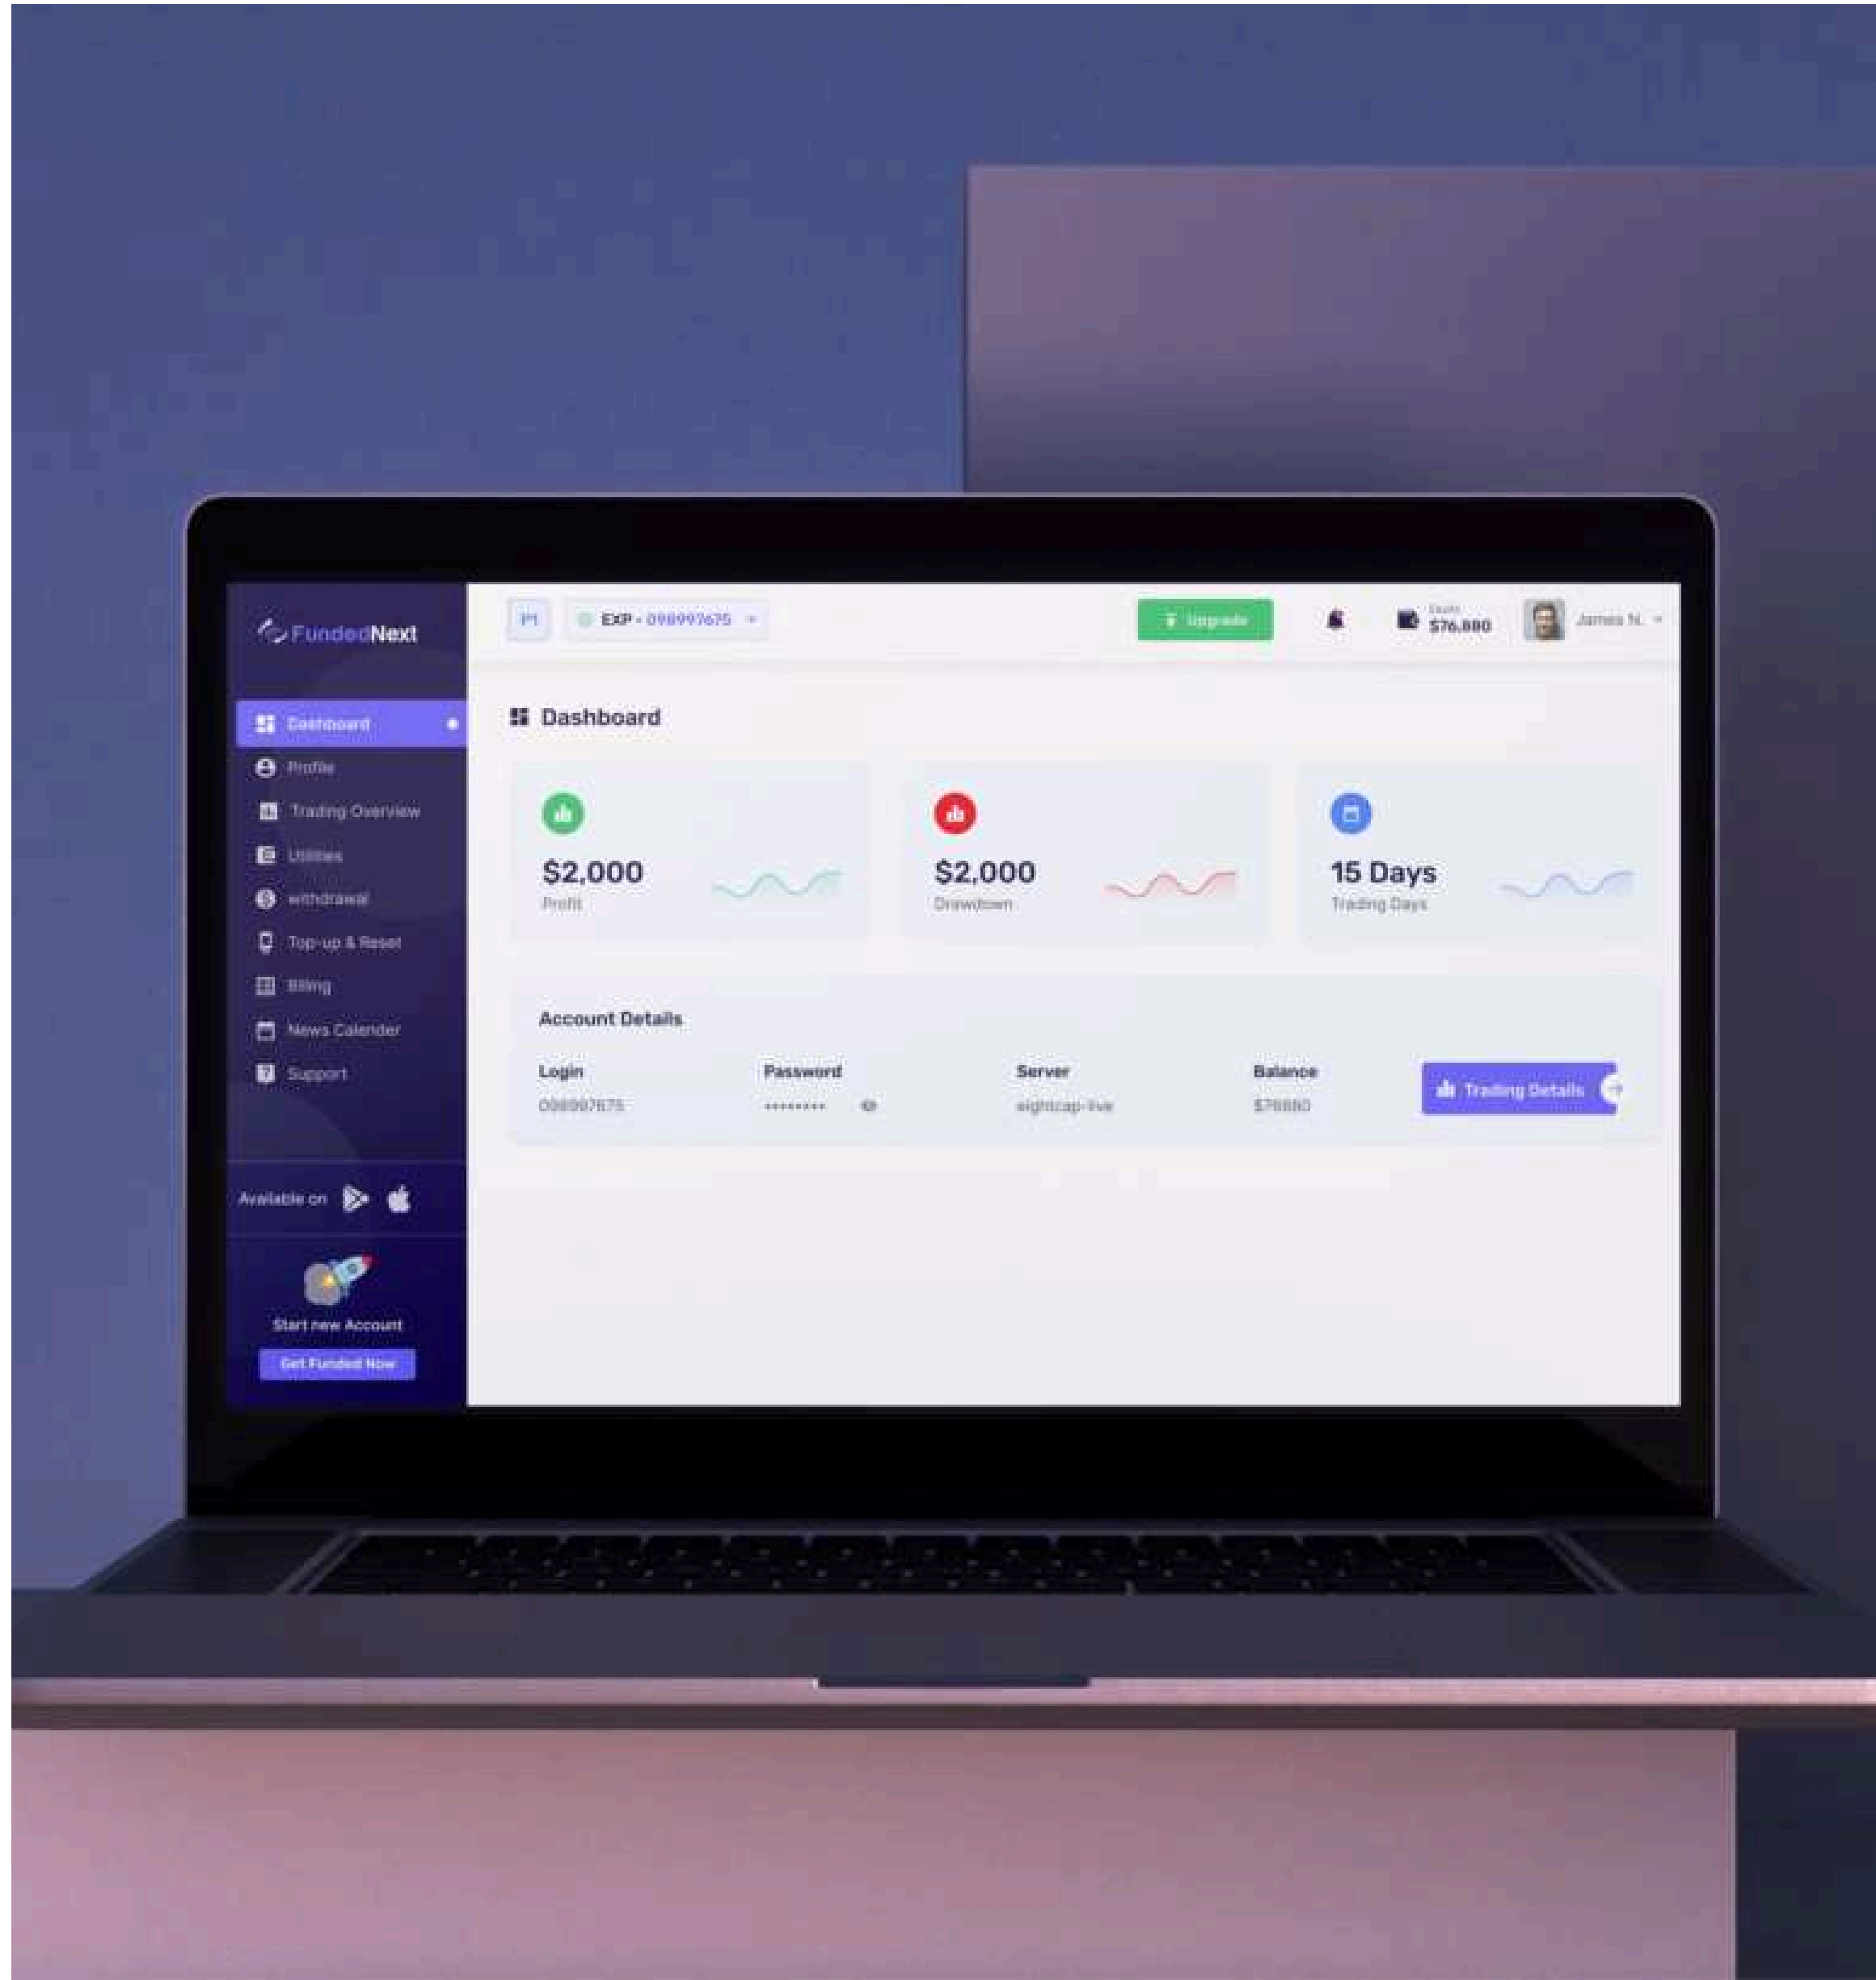

The Problem

Many skilled traders worldwide struggle to access the resources, capital, and cutting-edge strategies necessary to maximize their potential in financial markets. They often face limitations in scaling their trades, lack advanced risk management tools, and may not have the backing of a reliable trading platform that can help them grow consistently. Additionally, traditional trading firms may not provide the level of support and community that fosters long-term success for traders.

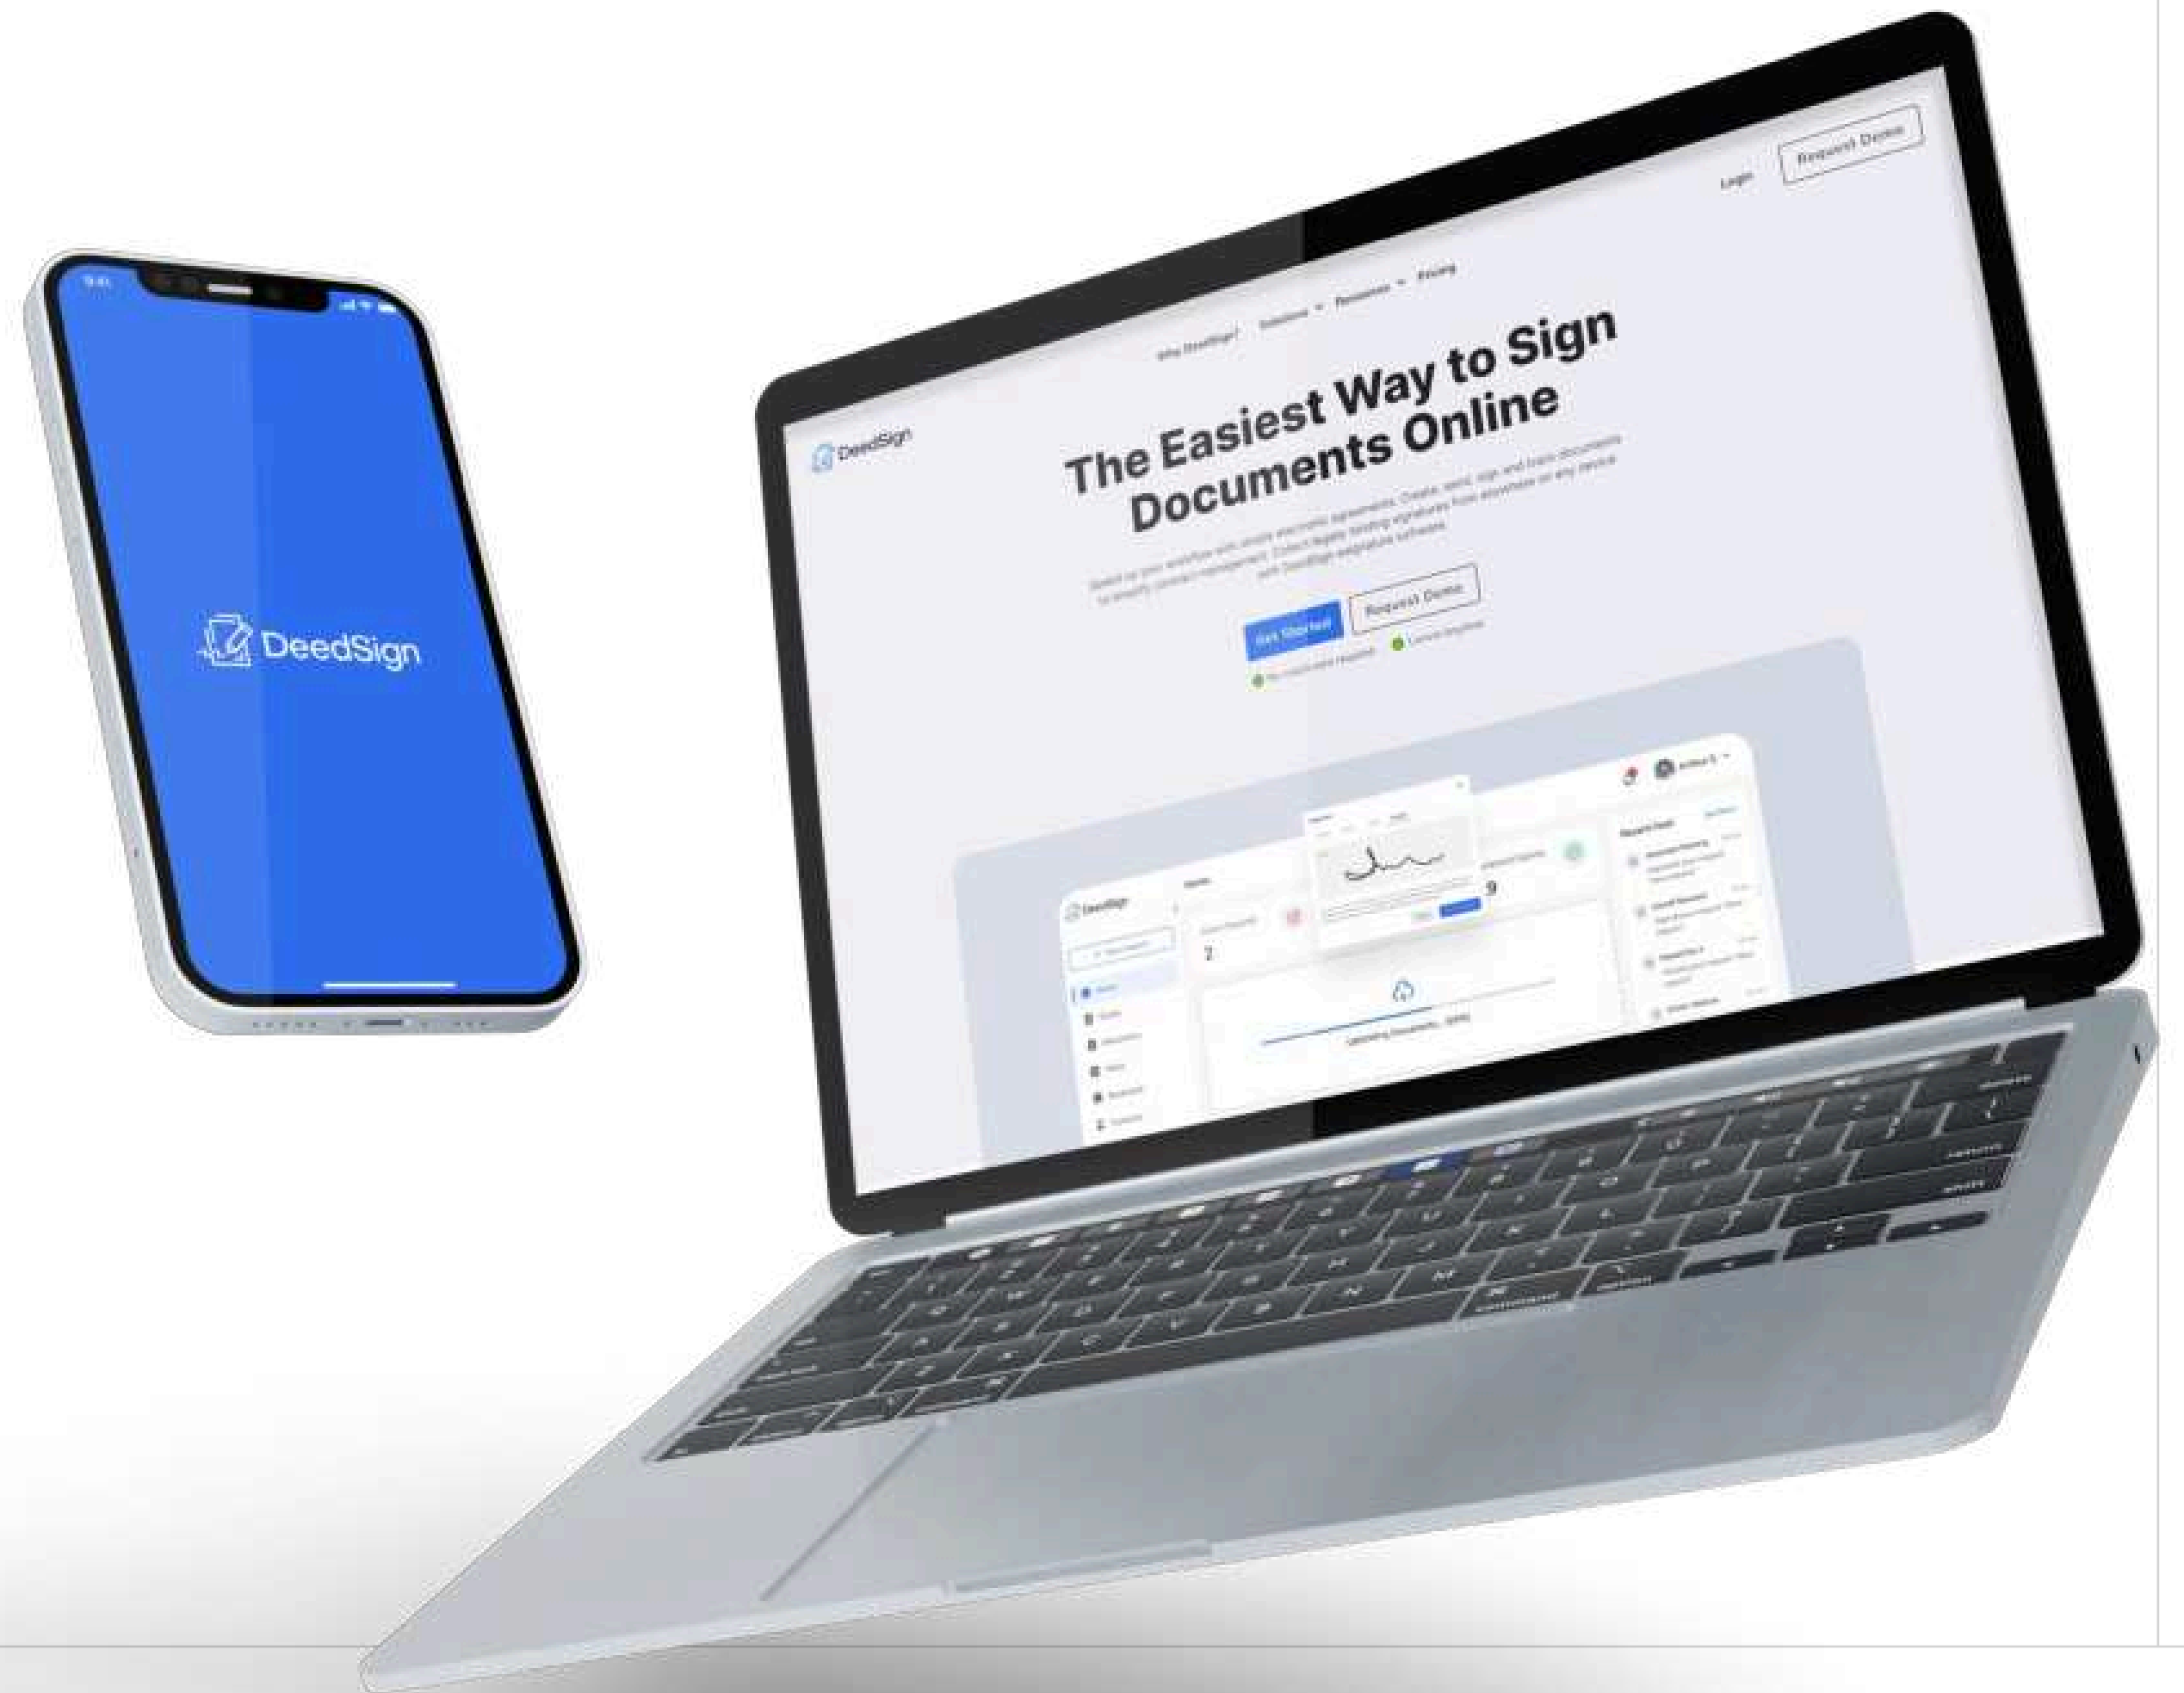

The Solution

FundedNext provides a global platform for talented traders, offering them access to capital, advanced strategies, and support to elevate their trading experience. By empowering traders with the tools, mentorship, and financial backing, FundedNext aims to revolutionize their trading journey, ultimately transforming the lives of 50 million traders worldwide.

eSignature SaaS with App (DocuSign Alternative)

DeedSign

DeedSign is an easy-to-use, modern, and secure Cloud-based eSignature platform to simplify and automate document workflows for business functions.

Headquarters

Sheridan, WY 82801, USA

Industry

Agreement Management, SaaS

Service We Provided

- ◆ UX/UI Design
- ◆ API Development
- ◆ Backend Development
- ◆ DevOps Managed Services
- ◆ Mobile App Development
- ◆ Regular Maintenance

Background

DeedSign is a secure electronic signature platform that streamlines document signing for businesses. Accessible via web and mobile, it offers legally binding e-signatures, simplifying workflows and reducing paperwork for efficient and compliant document management.

The Problem

Many businesses face inefficiencies and security risks when handling paper-based or outdated digital document signing processes. Traditional methods can be time-consuming, prone to errors, and lack the necessary security measures to ensure signatures are legally binding. Businesses needed a reliable, user-friendly solution to streamline the signing process, ensuring compliance with legal standards while improving overall efficiency and reducing paperwork.

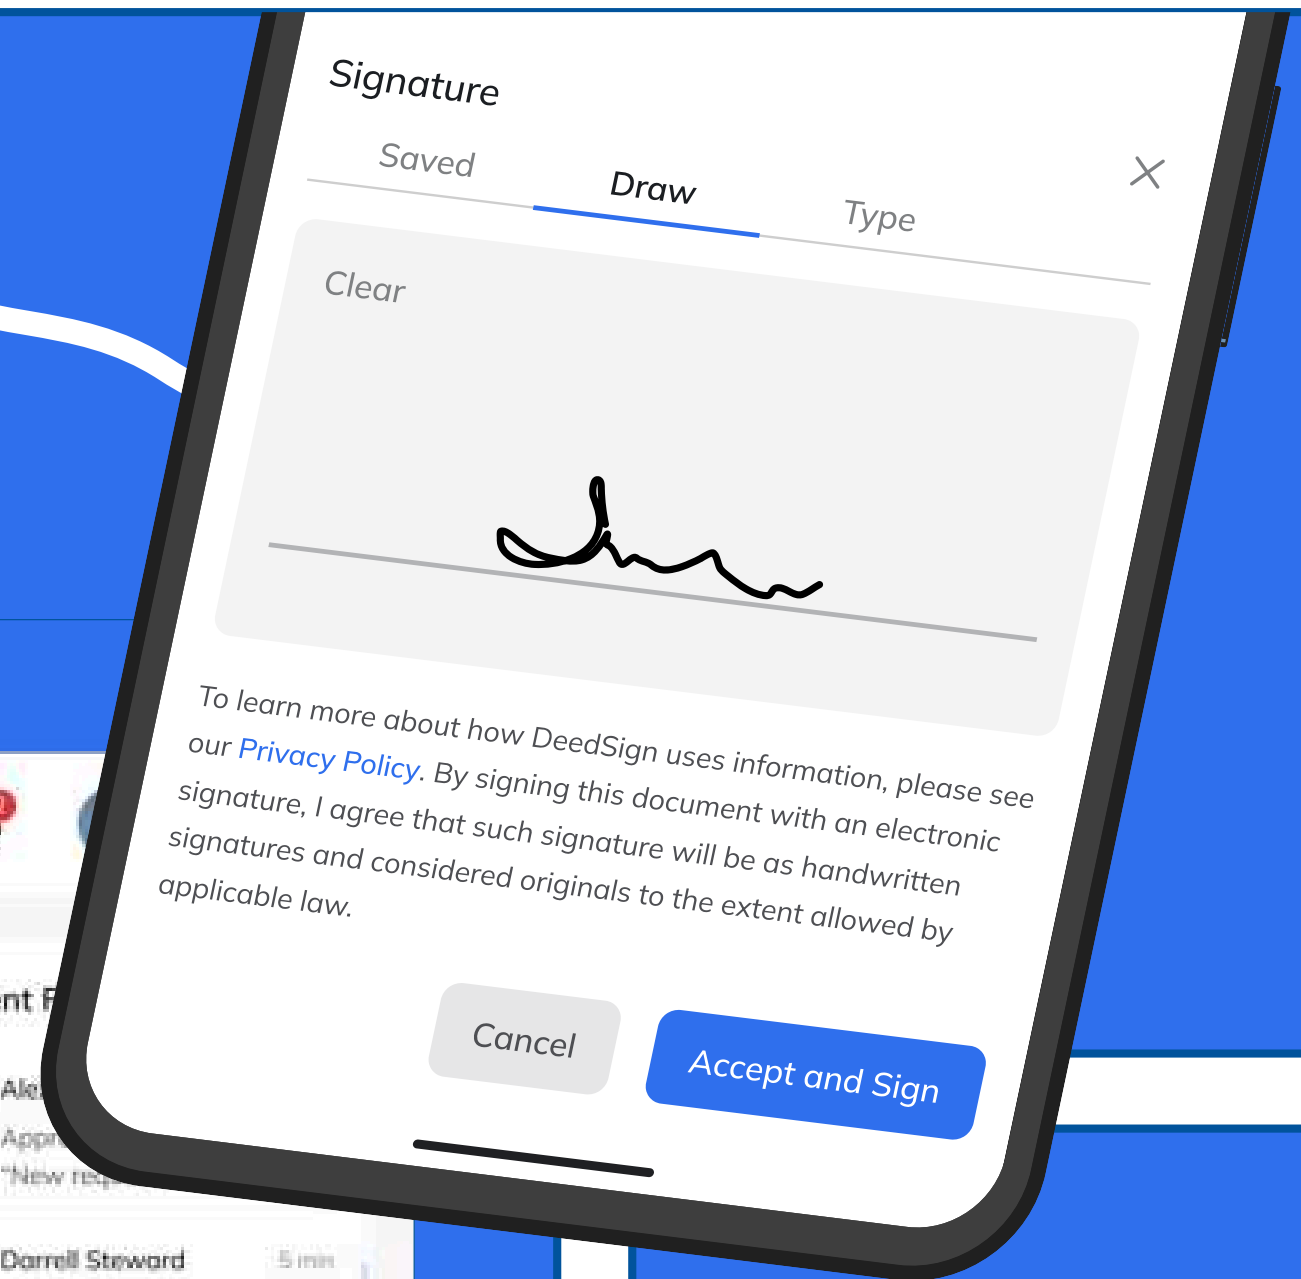

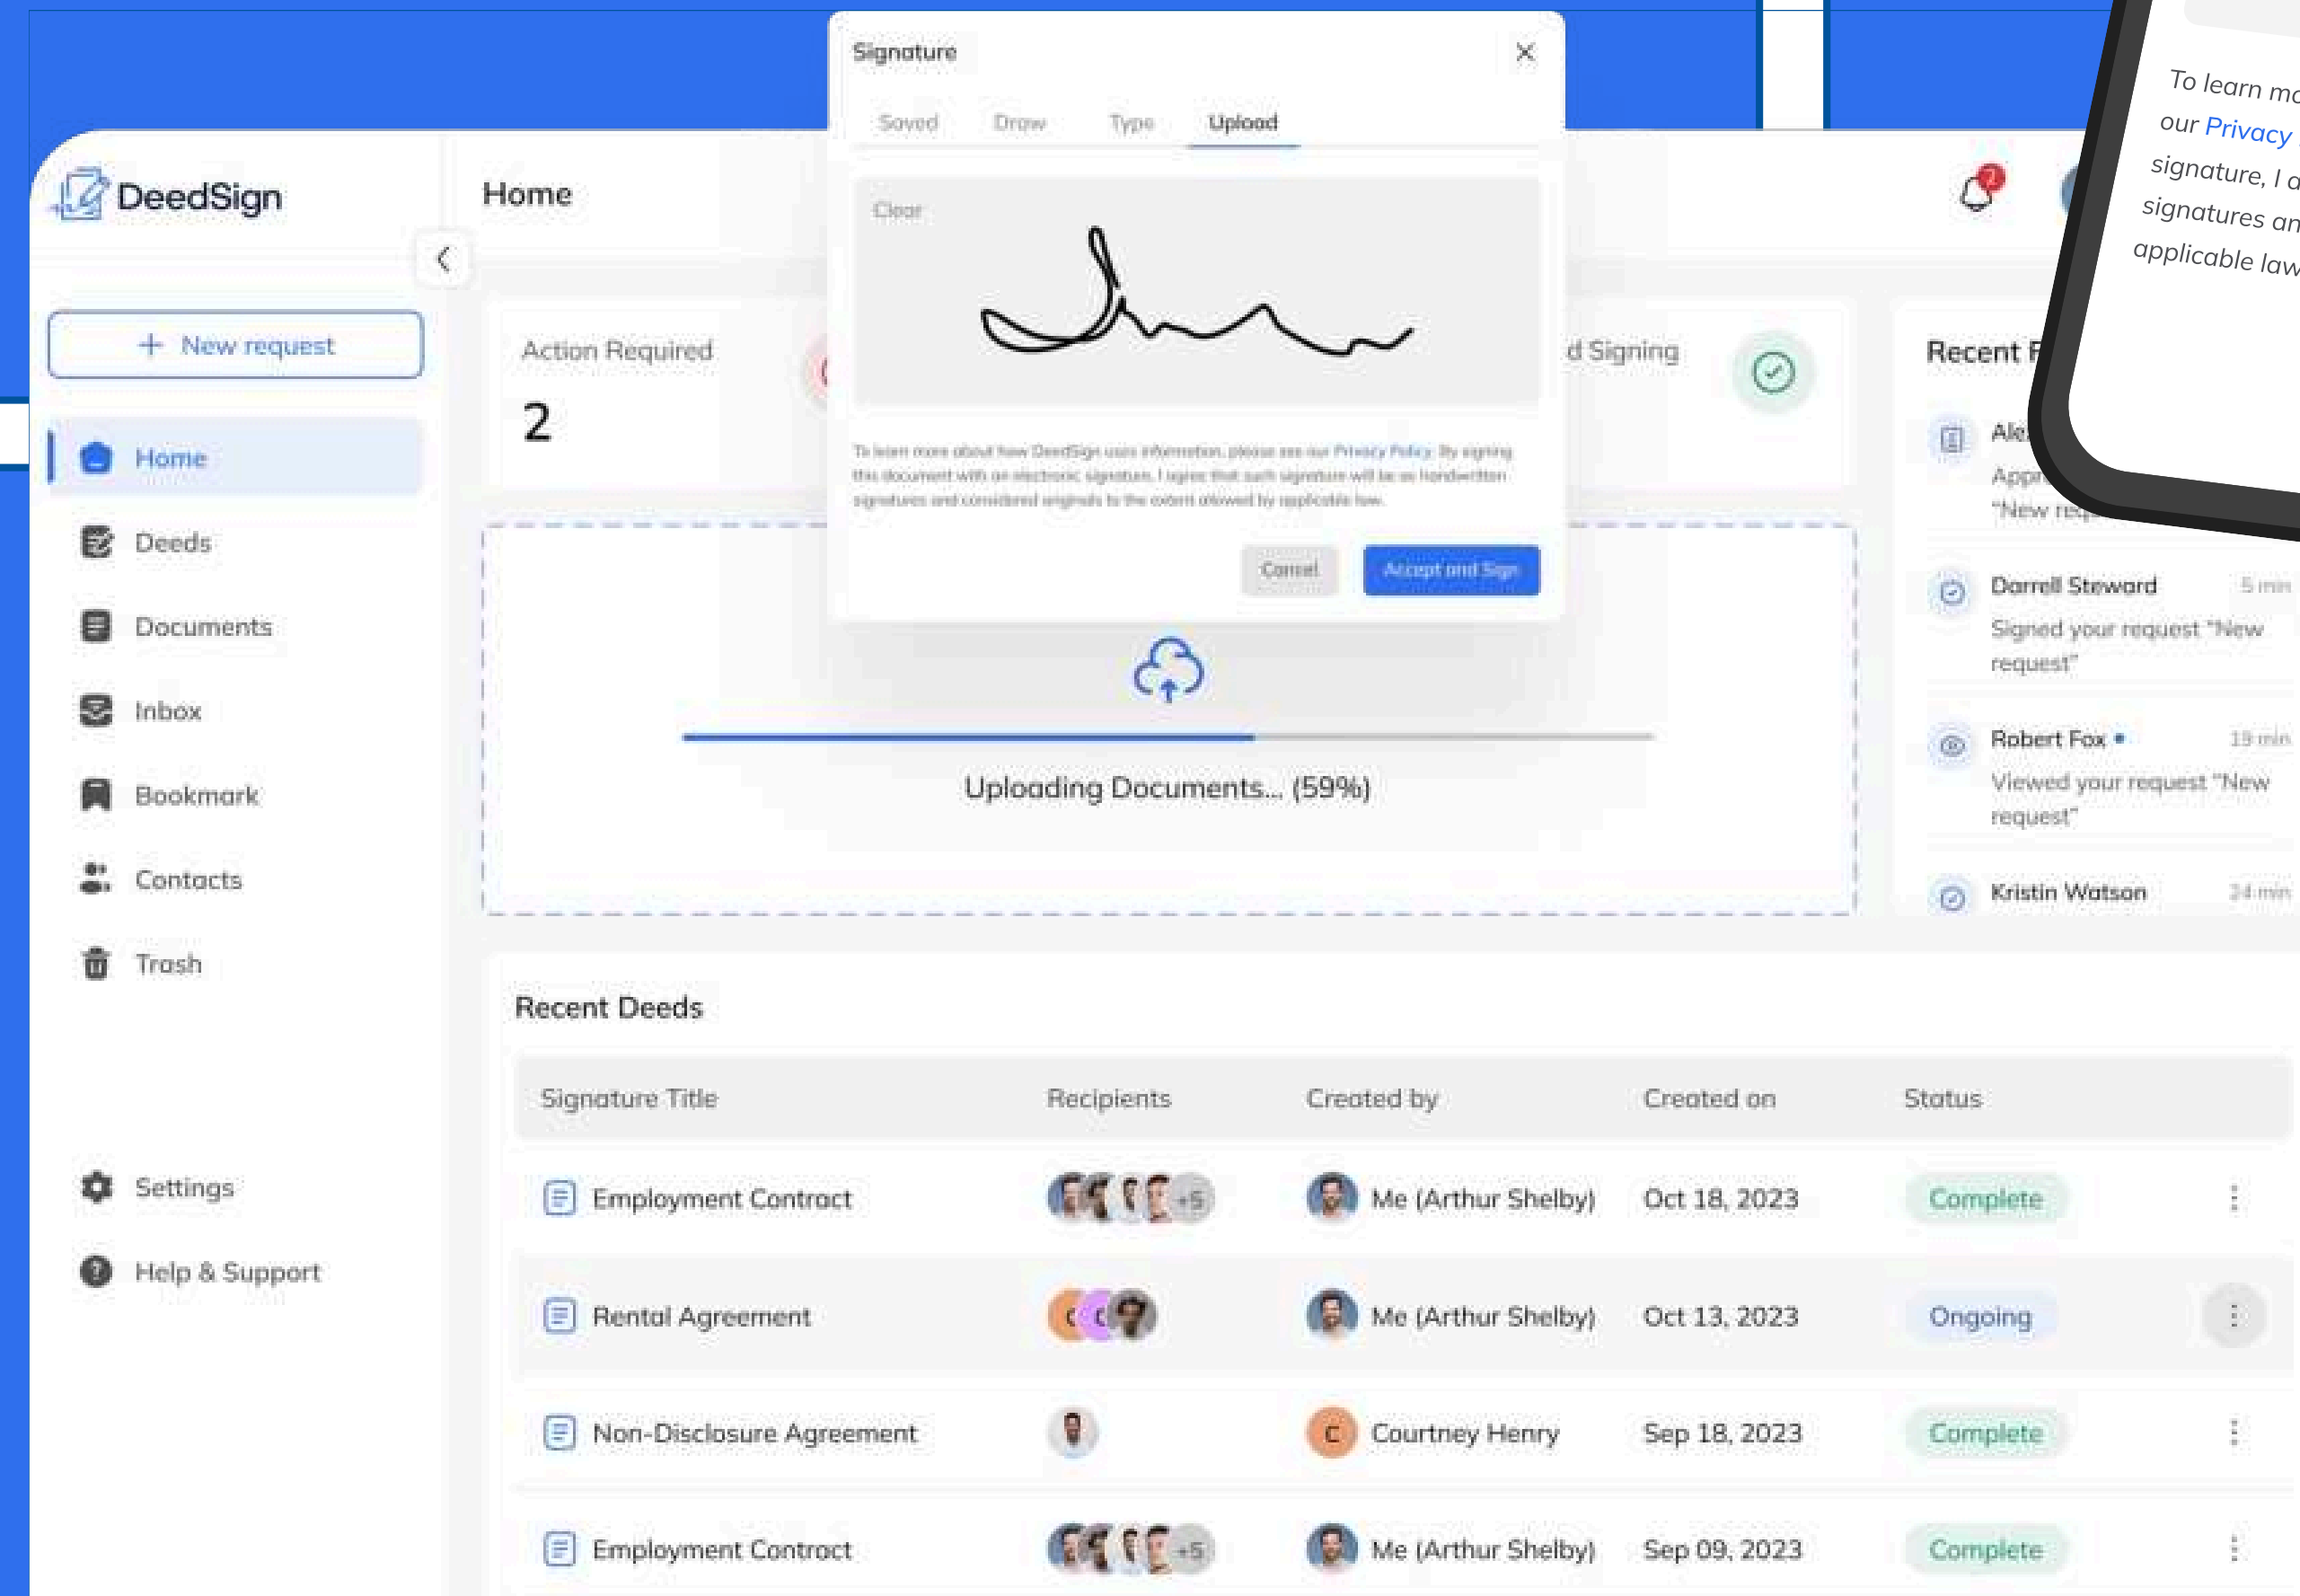

The Solution

Our team designed and built a robust electronic signature platform, offering functionalities similar to DocuSign. This web and mobile application streamlines the document signing process for businesses, allowing them to securely collect legally binding e-signatures.

Industry

Crowdfunding, Content Monetization, SaaS

Service We Provided

- ◆ UX/UI Design
- ◆ API Development
- ◆ Backend Development
- ◆ DevOps Managed Services
- ◆ Webflow Development
- ◆ Regular Maintenance

Background

Content monetization and subscription tools assist creators such as artists, video creators, podcasters, and more in building a reliable income stream. These tools simplify the process for fans to tip and donate, support creators through memberships, and purchase their unique creations.

The Problem

Individual creators and organizations often struggle with creating visually appealing and functional websites due to a lack of design and development expertise. They need a streamlined solution for building customized marketing websites that showcase their brand and work effectively. Without a user-friendly interface and seamless user experience, these websites fail to engage visitors or convert them into customers or supporters.

The Solution

We developed multiple web applications for individual creators as well as for organizations. Our service included UI/UX design and the development of marketing websites using Webflow.

SAAS Based Product Review Solution for Shopify Businesses

ReviewXpo

ReviewXpo is a Shopify app that automates customer review management.

Trusted By

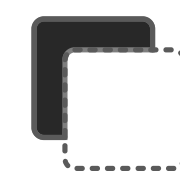

1000+ Businesses

Industry

eCommerce, SaaS

Service We Provided

- ◆ UX/UI Design
- ◆ API Development
- ◆ Backend Development
- ◆ Shopify Development
- ◆ DevOps Managed Services
- ◆ Webflow Development
- ◆ Regular Maintenance

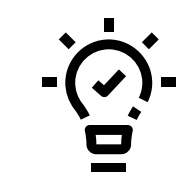

Background

The ReviewXpo Product Reviews App is a Shopify app that helps store owners collect, import, and showcase product reviews, including text, photos, and videos, with detailed multi-criteria ratings. It automates review requests, provides customizable display options, and offers AI-generated responses to reviews.

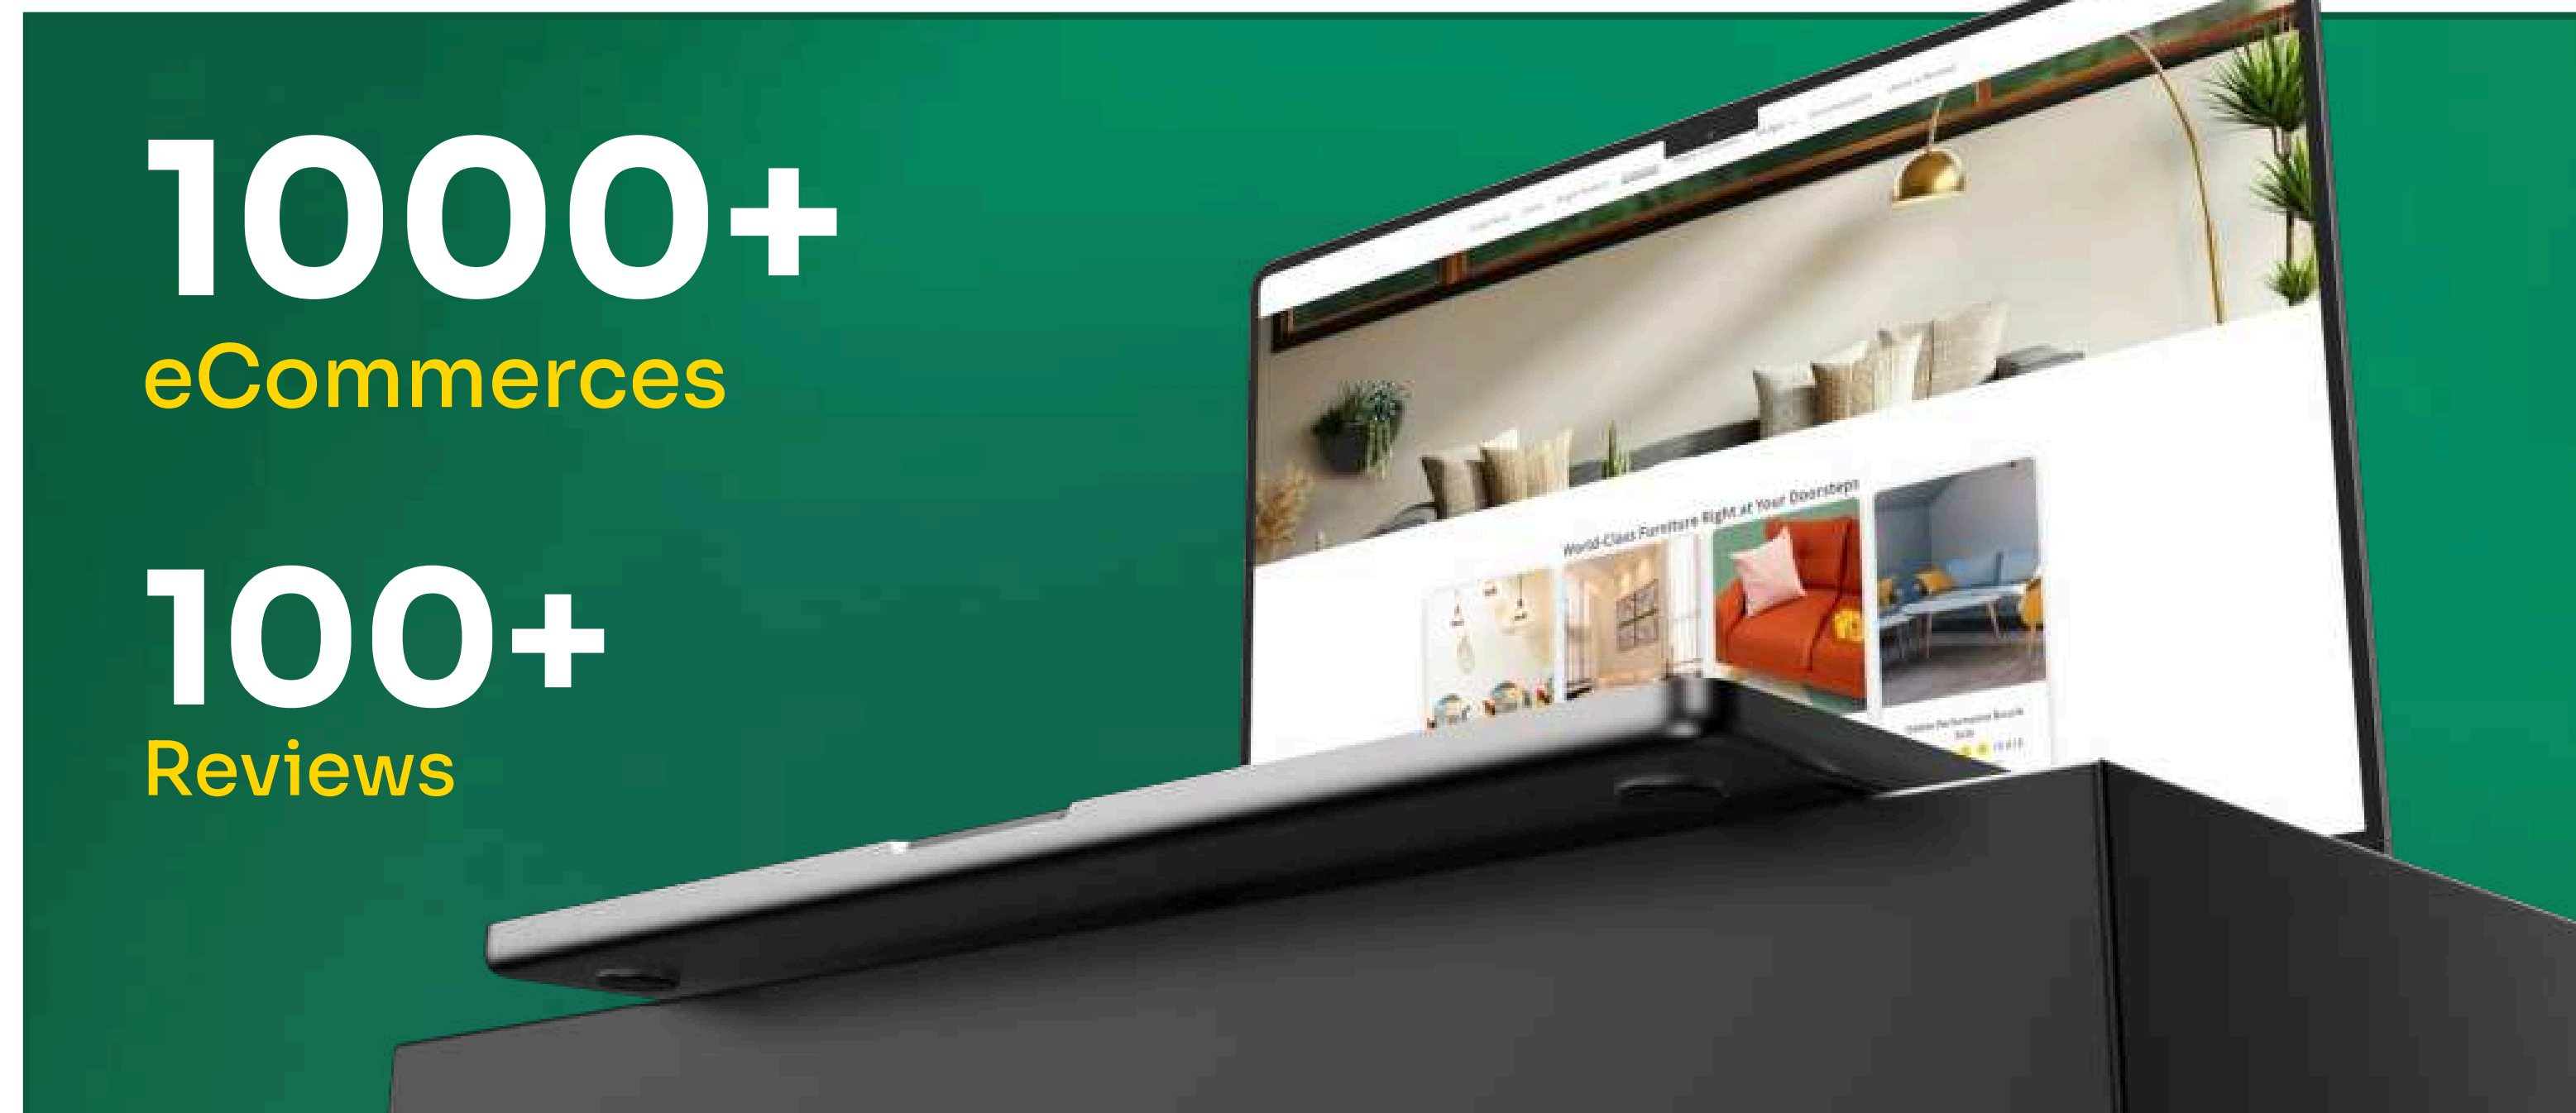

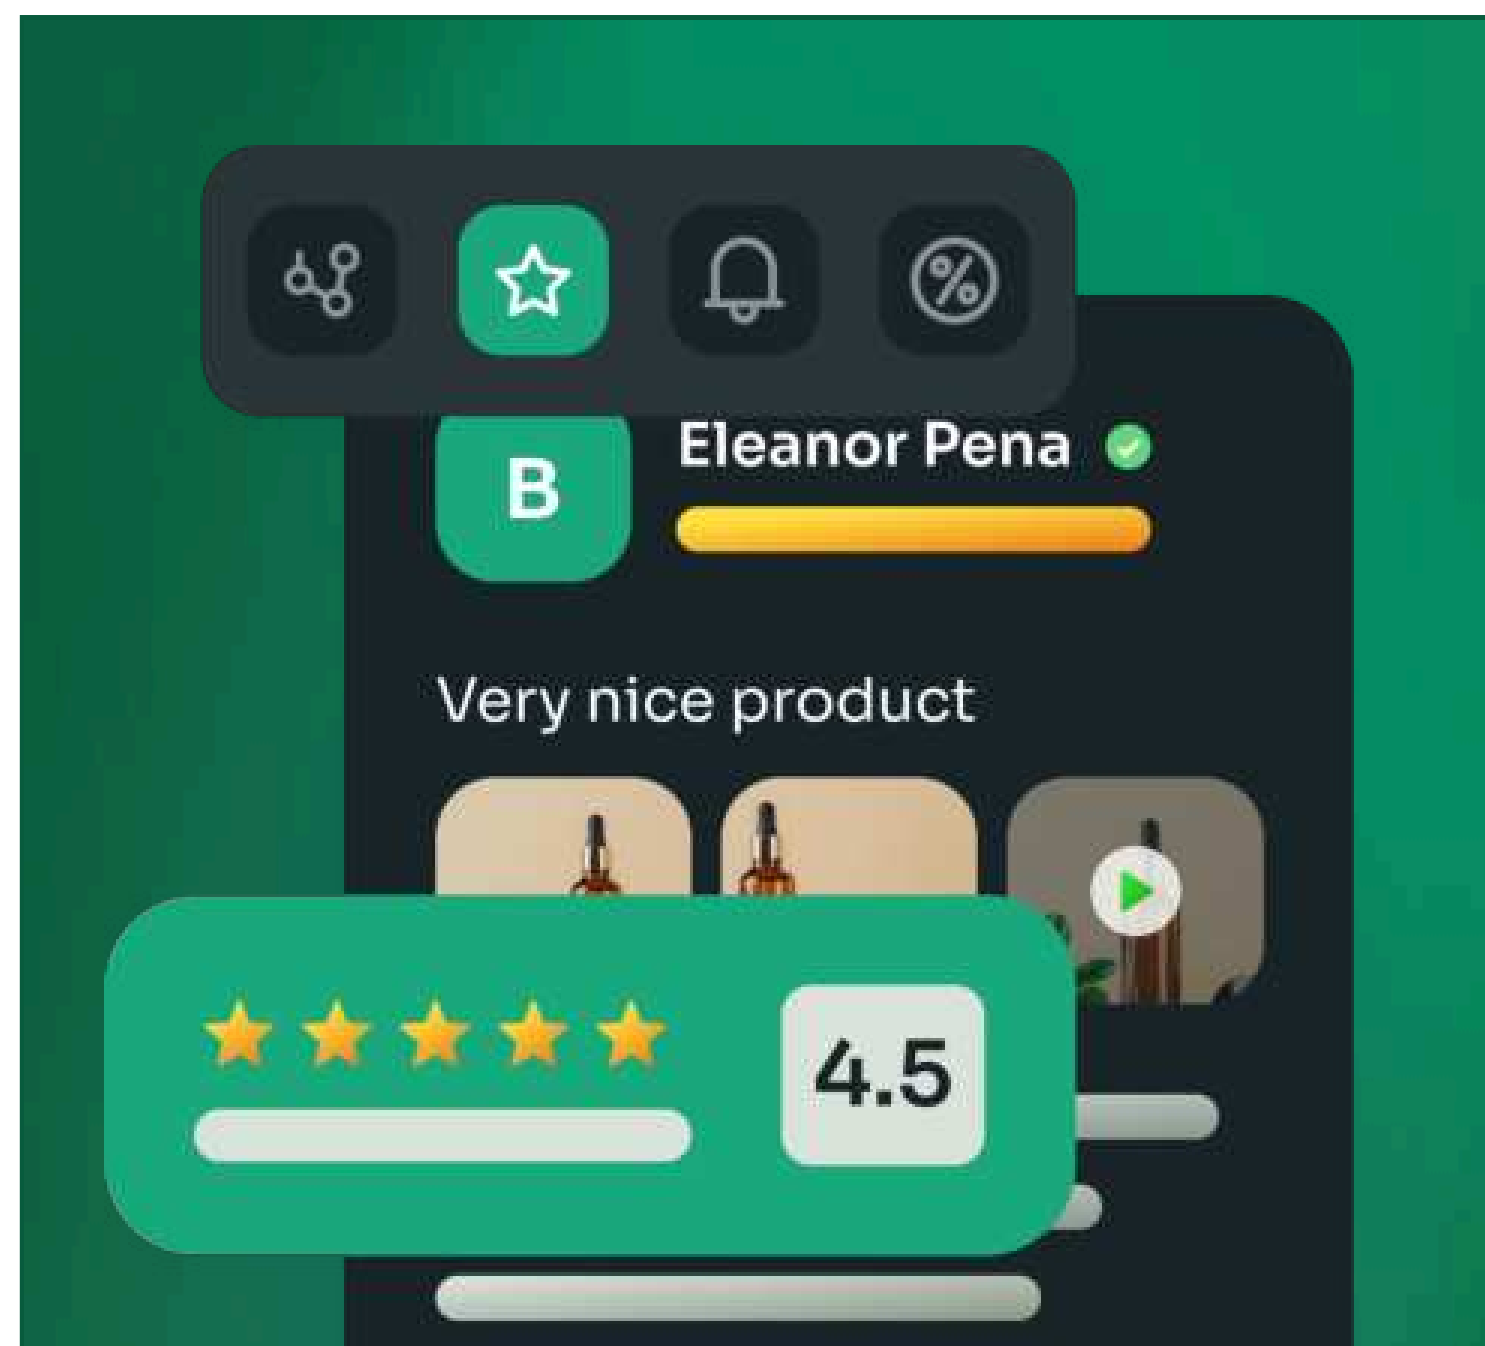

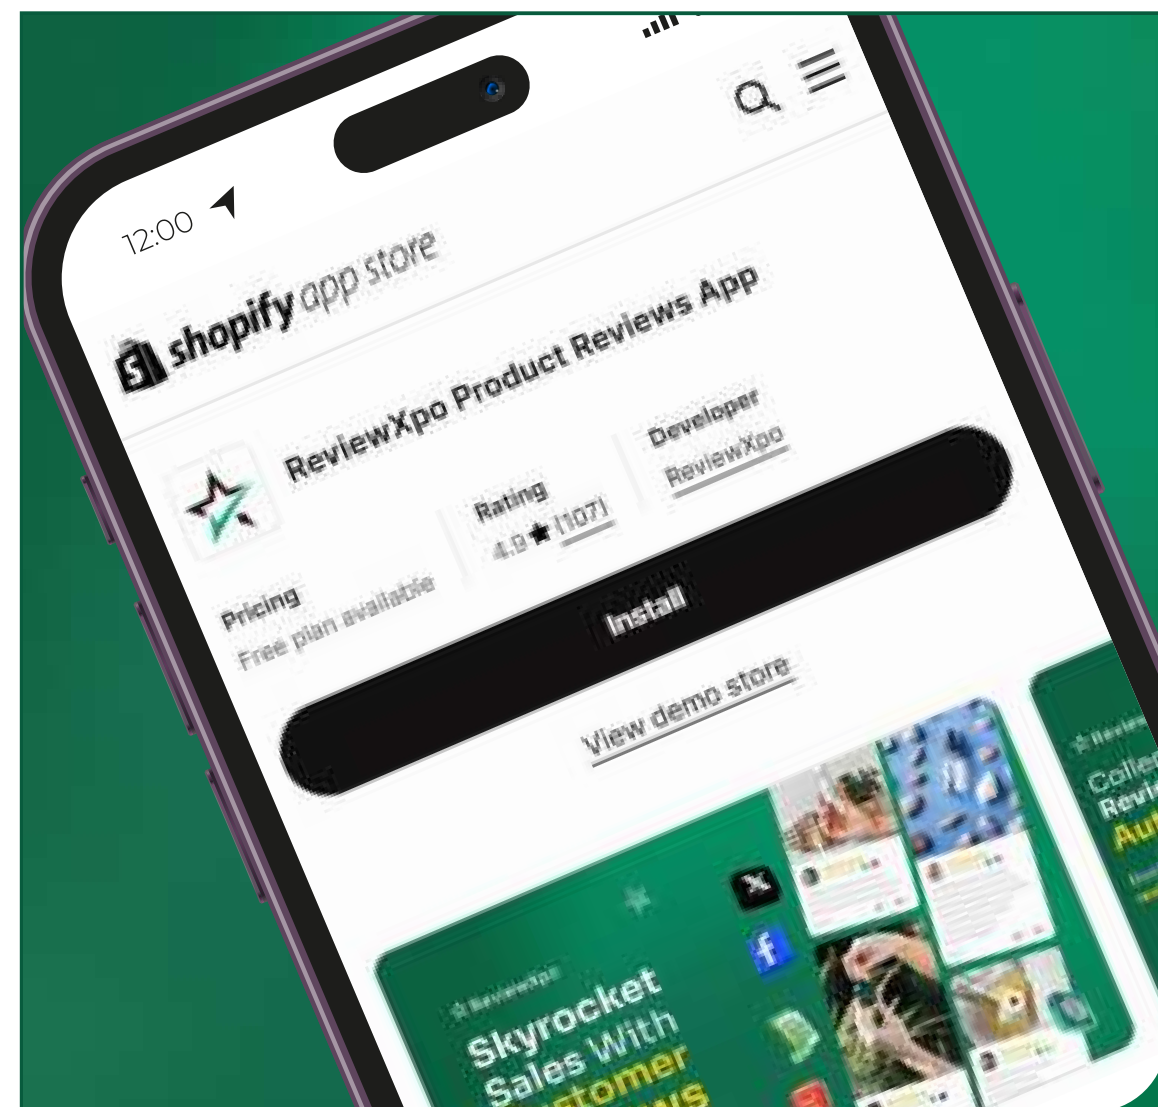

The Problem

Shopify merchants often struggle to collect and display customer reviews effectively on their stores. Without a seamless way to showcase reviews, it becomes challenging to build trust with potential buyers and increase conversions. Merchants needed an easy-to-use solution integrated directly with Shopify to manage and highlight product reviews, improving customer confidence and driving more sales.

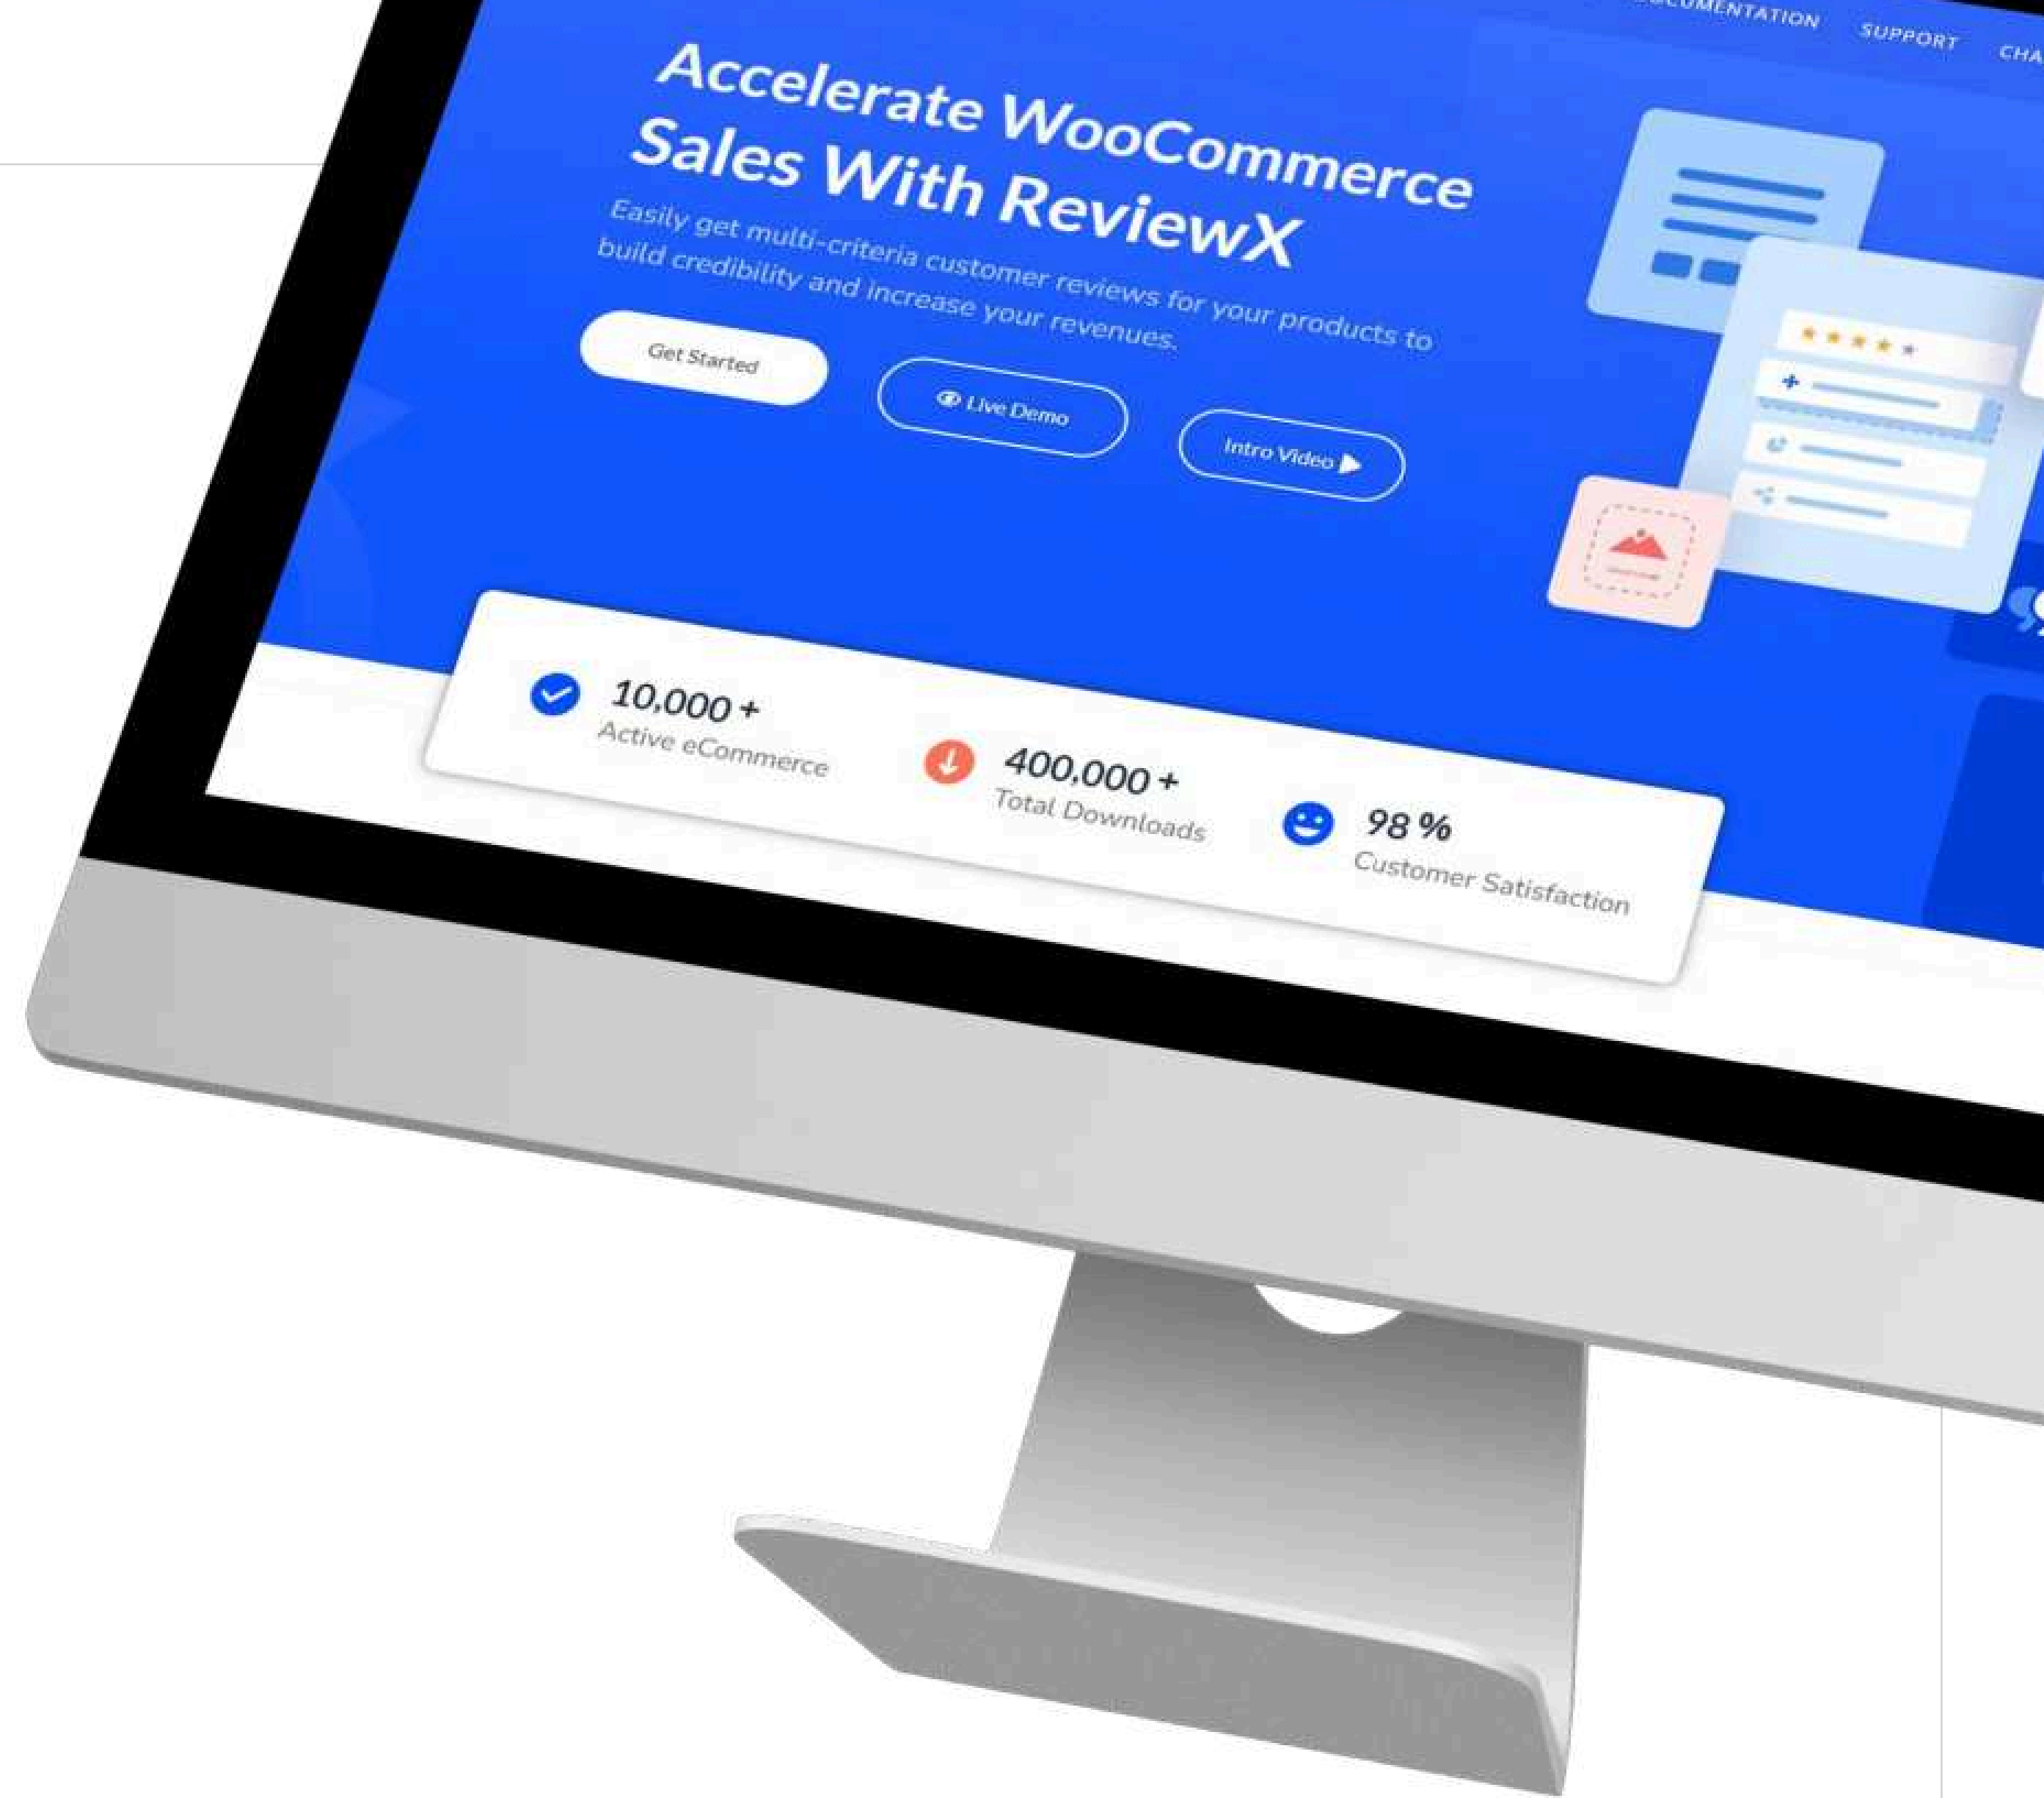

The Solution

Our team built and launched a feature-rich product reviews app for the Shopify app store marketplace. This application allows Shopify merchants to seamlessly collect and showcase customer reviews on their online stores, fostering trust and boosting conversions.

SAAS Based Product Review Solution for eCommerce

ReviewX

ReviewX let's you get instant customer rating and multicriteria reviews to add credibility to your WooCommerce Store and increase conversion rates.

Trusted By

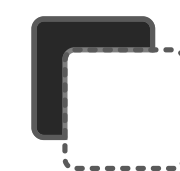

1000+ Businesses

Industry

eCommerce, SaaS

Service We Provided

- ◆ UX/UI Design
- ◆ API Development
- ◆ Backend Development
- ◆ Shopify Development
- ◆ DevOps Managed Services
- ◆ Regular Maintenance

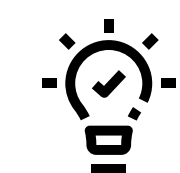

Background

ReviewX is a WooCommerce plugin that helps businesses collect and display detailed customer reviews. It boosts credibility and sales with multi-criteria reviews, automated reminders, and graphical stats. Easy to manage from the WordPress dashboard, it integrates smoothly with popular page builders.

The Problem

Businesses using WordPress struggle to effectively use customer feedback on their websites. Without an easy way to collect, manage, and display reviews, they face lower trust and conversion rates. Managing reviews manually is inefficient, and existing solutions often don't integrate well with WordPress, causing technical issues and extra costs.

The Solution

Our team designed and built a user-friendly WordPress product reviews app, empowering businesses to leverage the power of customer feedback on their websites. This plugin integrates seamlessly with WordPress, allowing businesses to collect, manage, and display authentic product reviews, fostering trust and driving conversions.

Crypto-Currency Based eCommerce Web & Mobile App

WI Bazaar

The incentivized e-commerce platform for consumers, influencers, and promoters helps drive sales. It uses a proprietary affiliate marketing system and a loyalty reward program.

Headquarters

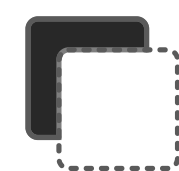

Singapore

Industry

eCommerce

Service We Provided

- ◆ UX/UI Design
- ◆ API Development
- ◆ Backend Development
- ◆ E-Commerce Development
- ◆ Crypto-Currency Web & Mobile App
- ◆ DevOps Managed Services
- ◆ Regular Maintenance

Background

Cryptocurrency (own coin) powers all crucial processes in the WiBazaar ecosystem. Through a proprietary affiliate incentive marketing system, a unique sharing model is implemented. This model enables merchants to set their incentives, which not only boost their sales but also promote the growth of WiBazaar.

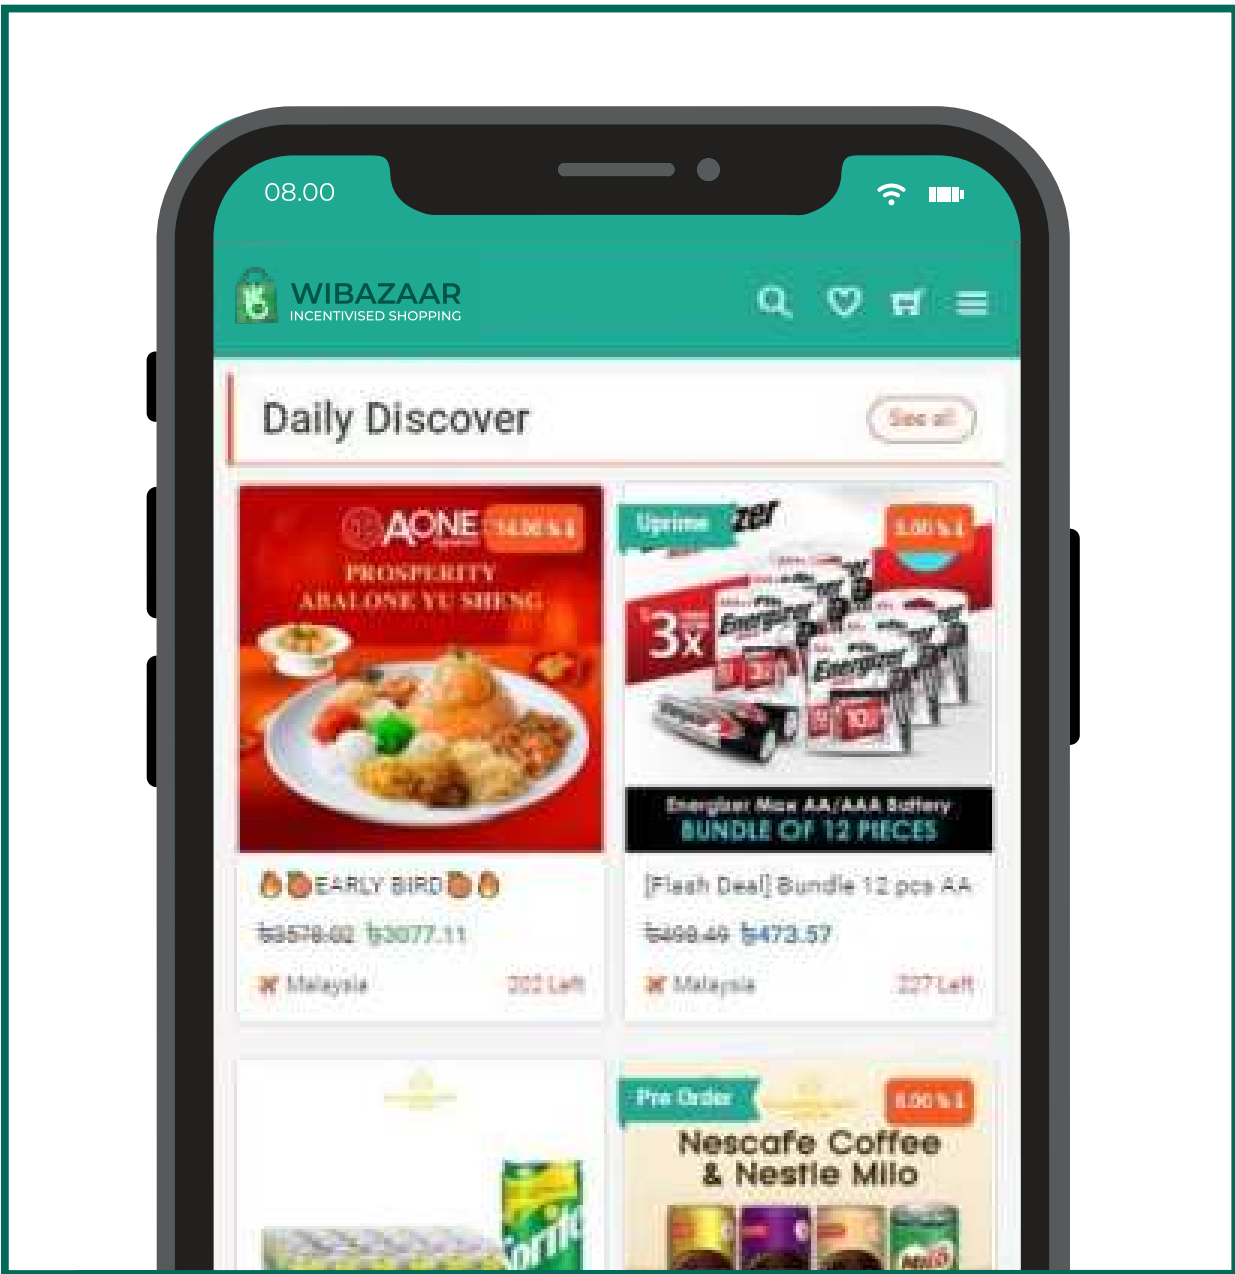

The Problem

Prior to WiBazaar, the e-commerce landscape was fragmented, lacking a unified platform that effectively incentivized participation. Merchants struggled to attract and retain customers, and the overall ecosystem struggled to grow sustainably. WiBazaar addressed these challenges by creating a cohesive platform where merchants could set their own incentives, driving sales and fostering a more vibrant and thriving e-commerce environment.

The Solution

We developed multiple Flutter applications for both Android and iOS, catering to both buyers and merchants. Additionally, we created web applications for admin and merchant usage.

What Our Client Say About Us

JoulesLabs is very down-to-earth and honest, working directly with the client to ensure they're achieving progress. The team provides periodic updates. I only have good praise for them; they've done a fantastic job for us.

Vincent Oh

Managing Partner of Media
Publishing Firm

[View review on clutch](#) ↗

JoulesLabs integrated all hardware features seamlessly with the mobile app and backend. They researched new tools and problems and quickly adapted their existing teams to incorporate those learnings.

Chief Business Officer

EV Battery Charging Co

[View review on clutch](#) ↗

From day one they have been very cooperative, and they have treated my project as their own. I would definitely recommend JoulesLabs to other business owners who want to excel with their digital product.

Abdullah Jayed

Founder/CEO of FundedNext
& NEXT Ventures

[View review on youtube](#) ↗

JoulesLabs fostered a collaborative partnership throughout the project, treating me as a valued partner. The team offers transparent communication and prompt responses. They strive to create tailored solutions.

Gaji Sumon Hossain

Founder of DeedSign LLC
